

PAE

With High Mechanical Strength

Ideal for:

STERILE R EO

WIPAK

WIPAK is a member of Sterile Barrier Association

PAE

With High Mechanical Strength

Material Composition

- Laminated PA / PE film
- Typical thickness range: 70-100 microns

Applications

- General thermoforming packaging material for medical devices
- For EO gas and irradiation sterilization
- Sealable and Peelable with uncoated papers

Benefits

- Easy forming providing increased production efficiency
- Remarkable strength
- Excellent mechanical properties

Wipak reserves right to make changes at any time without notice.
