

Wiicare® FitSteam™ Steam Sterilizable Thermoforming Bottom Webs

PAP

Printable Forming Film for Steam

PAP - Printable Forming Film for Steam

PAP is adhesive laminated formable top or bottom web for steam sterilization applications. Film is suitable for all common horizontal form, fill, and seal machines and also for pouch making.

Technical Details

- Laminated PA/PP film
- 60, 70 and 100 microns

Benefits

- Wide sealing window
- Available sandwich or surface printed
- High puncture resistance and mechanical strength

Applications

- Sealable with steam papers
- For packaging of pre-filled syringes, bandages and other steam sterilizable medical devices
- For steam and EO sterilization
